Nanoveu Expands EyeFly3D™ to Android Smartphones

Highlights:

- **Flagship product EyeFly3D™ for the first time compatible with Android smartphones**
- **New product line available for use on Google Pixel 3, 3 XL, 3a, and 3a XL**
- **EyeFly3D™ Android apps approved and available on Google Play store**

Nanoveu Limited (“Nanoveu”) is pleased to announce that it is deepening its foray into global smartphone markets by offering its flagship product EyeFly3D™ for the first time in a version compatible with Android phones.

The new product line, which is currently available for purchase on the EyeFly3D™ website and soon to be in stock at Amazon in the U.S., will initially be available for use on a range of Google smartphones (Google Pixel 3, 3 XL, 3a and 3a XL). Depending on market demand, Nanoveu plans to develop additional screen protector variants for other types of phones and tablets.

Nanoveu’s new EyeFly3D™ screen protectors for Google Pixel phones will be sold on all existing distribution channels. These channels include physical retail stores, online sales platforms and the company’s own website.

EyeFly3D™ software launched on Google Play

The groundbreaking 3D screen technology, which converts 2D digital displays into 3D without the need for 3D glasses, is powered by proprietary software that can be downloaded onto smartphones. The new apps for Android, EyeFly3D Pix and EyeFly3D Vid, have been submitted to the Google Play store, approved, and are now available for download.

The move greatly increases Nanoveu’s ability to reach new customers and unlock opportunities in the mobile gaming market, which is dominated by Android phones and which Nanoveu is seeking to service. So far, Nanoveu’s award-winning 3D screen technology EyeFly3D™ had only been available for use on Apple iPhones. The addition of EyeFly3D™ products for Android smart phones expands the addressable market for EyeFly3D™ products.

– ENDS –

Forward Looking Statements: Statements regarding plans with respect to Nanoveu’s outlook are forward looking statements. There can be no assurance that Nanoveu’s plans will proceed as expected and there can be no assurance that product sales will eventuate as intended.

About Nanoveu:

Nanoveu is a technology company, which has developed a new generation of highly immersive screen protectors for the global smartphone market.

Backed by pioneering, patented research from Singapore's leading science and technology organisation, Nanoveu's flagship EyeFly3D™ product converts 2D digital displays into 3D without the need for 3D glasses.

EyeFly3D™ has won numerous industry awards and is currently available for Apple iPhones and Google Pixel 3 phones.

Nanoveu is also developing EyeFyx, a vision-correction technology combining software and a screen protector to enable people with age-related farsightedness (presbyopia) to read smartphones and tablets without reading glasses. Age-related farsightedness (presbyopia) is one of the most common types of vision loss, affecting nearly one-quarter of the world's population and anyone living beyond middle age, according to the World Health Organization and the American Academy of Ophthalmology.
